

## ROC USB - Server Interface Unit for Smart KVMs

MODEL NUMBER: **0SU51079**

### Description

The ROC USB Server Interface Module connects to the HD15 and USB ports on a computer/server, and converts them to a single RJ45 connector. Ordinary Cat5e patch cables can then be used to connect the computer/server to the switch ports on a Smart KVM switch. Use of Cat5e cables frees up space in the installation that would be filled by traditional, thicker KVM cables.

### Features

- Needed to connect a USB Server to a Smart KVM switch via Cat5e cable
- Easy to install; no software needed
- No power supply needed
- Allows a recommended maximum distance of 100ft from KVM to Server via Cat5e cable
- Compact and lightweight design

## Specifications

OVERVIEW	
Accessories Type	Server Interface Unit
WARRANTY	
Product Warranty Period (Worldwide)	3-year limited warranty

### Highlights

- Needed to connect a USB Server to a Smart KVM switch via Cat5e cable
- Easy to install; no software needed
